DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/11/09 has been entered.

Allowable Subject Matter

2. Claims 2-7, 9-14, 16-23, 25-34 & 36-49 are allowed. Considering claims 45-49, the amendments filed 3/11/09 overcome the previous rejection of Rangan, in view of Ice. However Guo, which is in the same field of endeavor teaches a system that uses Helper nodes H_{i-n} to cache and forward content to different receivers, R. However, prior art still does not teach the combination of elements presently recited, including receiving at a first user device a list comprising a plurality of different content selections; sending from the first user device a content selection whose delivery is requested at a present time to a transmission scheduler; after the content selection is sent from the first user device and in response to instructions from the transmission scheduler, creating a first communications link between the first user device and a

Art Unit: 2424

second user device that is receiving and rendering broadcast information representing the content selection, wherein the first user device is downstream from the second user device;

receiving at the first user device the broadcast information from the second user device via the first communications link to render to a first user device; receiving at a third user device the list comprising a plurality of content selections; sending from the third user device a second content selection whose delivery is requested at a present time to the transmission scheduler;

while receiving the broadcast information at the first user device and in response to instructions from the transmission scheduler, creating a second communications link between the third user device and the first user device which is receiving the broadcast information representing the second content selection, wherein the third user device is downstream from the first user device; and retransmitting from the first user device the broadcast information to the third user device to render via the second communications link.

Claims 2-7, 9-14, 16-23, 25-34 & 36-44 depend directly or indirectly from the allowed independent claims, and are therefore allowable for at least the same reasons.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

A) Guo Teaches transmitting content from a Helper client to a plurality of Receivers.

B) Sen Teaches a standard multicasting algorithm.

C) Chao Teaches replicating data in a distributed computer system.
